SPORTS RYDER
SUPERCAR

ADJUSTABLE COIL-OVER SUSPENSION

DAILY DRIVER KITS

Daily Driver Street Kit 1:

Coils, bushes and damping rates are revised for the specific vehicle by GM. Pedders has developed our Sports Ryder suspension systems with the enthusiast driver in mind. An enthusiast Camaro driver expects nothing more and nothing less than an enthusiast G8 driver. Pedders streetable urethane uses shapes, voids and ratio of urethane to ferules and specific Dura strength to match specific loads to deliver exceptional handling with exceptional ride comfort. The ZETA II Camaro is seriously more advanced than the previous generation F-Body Camaro. The advanced IRS and virtual pivot point technology allows the ZETA II Camaro to deliver ride comfort and performance handling when mated with Pedders Bushes, Dampers, Coils, Sways and Endlinks. This bushing package is designed for the DIY hot rodders and is the entry into improving your handling, by reducing unwanted and un-needed movement. Both can be installed in as little as 2 hours. Adding the supplemental differential bushings listed below will give great control of the differential movement and improve reliability. Consider Adding EP1167.

DAILY DRIVER KITS

Daily Driver Street Kit 2:

The Street II includes all the bits in the Street I and adds our drop kit 1 coils. Since the Camaro arrives sitting rather tall, we conservatively drop the ride height with slightly higher coils rates. You bought the Camaro as a performance sedan and not to be a rock hard suitable only for the track toy. Everything we make for the Camaro keeps that in mind. It should drive like a European Coupe that cost three times as much -- but keep the passenger compartment comfortable for the longest trip. You'll find our Pedders Drop Performance SportsRyder springs, and bushed Camaro to do that and more. Ride quality is more composed than OE and the handling is excellent. Drop Kit 1 below gives your Camaro a moderately aggressive flat look, while still allowing your OE struts to have enough travel to be functional. Drop kit 1 (Using the optional 220035 rear coils) gives your Camaro a slightly raked look which can also allow more space for larger wheels and tires. For a traditional Muscle car look use coil 220035.

Daily Driver Street XA Kit:

This is a value Package with a kick. The new state of the art Pedders eXtreme Xa coil Overs are revolutionizing the auto community. The Mono tube 30 way adjustability will give you the ultimate in desired ride; a flexible ride. Maximum comfort when you want, to killer control when you have to show the world you are on top of your game. This package will include the critical bushings of Street 1. Plus our alignment package will give you full alignment extended alignment capabilities front and rear and adds 1 to 1.25 degrees of positive front caster! SCCA T2 Legal.

Daily Driver Camaro Bush Kit:

There are those that may have already installed springs, but need assistance with additional upgrading of their Suspension. This bushing Package upgrade will install all the bushings for a street application and significantly firm up the excess looseness while still giving an excellent ride quality, but will help "plant" your Camaro when you need it by eliminating unwanted and un-needed looseness. This makes your Camaro much more predictable. For Track, auto crossing and aggressive drag racing, and vehicles with over 450hp at the tires, the bushing kit recommended is our HD Bushing Kit.

ROAD COURSE KITS

Road Course Track 1Kit:

The Track I combines all the components of the Street II and adds sway bars, all bushes and adjustable Endlinks. With the virtual pivot point design and the advanced rear suspension your tracked Camaro does not need to be over sprung and over damped. In complete OE trim it will out perform many respected marquees. With a Track I System we are going hunting for the big boys with big dollar stickers. We add more urethane bushes to create greater control. These are Pedders exclusively designed urethane bushes that use voids, shapes and volume of urethane to increase control while maintaining an OE like ride. There are no squeaks. It is not rough. It is AMG like control. It has long been the Pedders philosophy that sway bars are not used to correct deficiencies in your suspension. Sway Bars are the final tuning step for a properly sprung, damped and bushed vehicle. Pedders sways offer four positions of adjustment front and three positions of adjustment rear. They include Pedder urethane bushes. They are perfectly matched to provide an amazing level of control as they compliment your Pedderised ZETA II Camaro, PLUS the flexibility to fine tune the control rates to fit your needs. Keep in mind, because the system is titled Camaro Track 1, this is a system designed for the street, that just happens to work well for the track! A special note: The Pedders Performance coil set offered in this kit will give you a moderately aggressive flat stance, and work very well with your OE dampers to allow adequate shock movement. However, many rear oversized tires and wheels may not allow you to make the rear drop so low. Therefore, you can swap the 220033 for the 220035 rear coils that will give you a more traditional hot rod rake look and will give added rear tire clearances for more tire clearances, and are spring rated to match the front drop coils. In terms of handling, the 220033 coils will be the performer. For Drag racing, the 220035 will be the ticket. For a traditional Muscle car look use coil 220035.

Road Course Track 2 Kit:

The Track II combines all the components of the Street II and adds sway bars, all bushes and adjustable HD Endlinks. With the virtual pivot point design and the advanced rear suspension you tracked Camaro does not need to be over sprung and over damped. In complete OE trim it will out perform many respected marquees. With a Track II System we are going hunting for the big boys with big dollar stickers. We add more urethane bushes to create greater control. These are Pedders exclusively designed urethane bushes that use voids, shapes and volume of urethane to increase control while maintaining an OE like ride. There are no squeaks. It is not rough. It is AMG like control. It has long been the Pedders philosophy that sway bars are not used to correct deficiencies in your suspension. Sway Bars are the final tuning step for a properly sprung, damped and bushed vehicle. Pedders sways offer four positions of adjustment front and three positions of adjustment rear. They include Pedders urethane bushes. They are perfectly matched to provide an amazing level of control as they compliment your Pedderised ZETA II Camaro, PLUS the flexibility to fine tune the control rates to fit your needs. This kit uses our Pedders eXtreme Xa Coil Overs that give you a massive amount of flexibility, custom tuning to your individual driving habits and needs. You will have complete suspension travel no matter what height you set the Xas at. This will give you the same comfort at a 2 inch drop as you would have at a 1/2 inch drop. For the SS Camaros with Brembos, we strongly recommend adding our Complete Brake Hose Kit for added performance and security.

Road Course Justice Kit:

The Justice Package will include all the suspension components that assisted him taking 7 seconds off the lap time of a stock 2 SS at Gingerman Raceway. This track ready package contains the best of the best of what Pedders has to offer, including our COMPETITION sway bar package, SOLUTION C, which, if improperly setup, creates velocity induced understeer. In the hands of a skilled SCCA or NASA certified driver, the Justice Package is perfect for the track. The initial Justice Package came with our off the charts great Pedders eXtreme 46mm Xa Coil Overs. The Justice Camaro now has our 52mm Remote Reservoir, high pressure nitrogen, independent bound and rebound adjustable Coil Overs. Supercar coilovers offer eXtreme flexibility to those knowledgeable in setup. The Track eXtreme combines all the components of the Street II and adds A COMPETITION ONLY Rear Sway bar, all bushes with all of our most HD options, 4 adjustable Endlinks and our new Pedders SportsRyder Supercar Remote Reservoir Coilovers. With the virtual pivot point design and the advanced independent rear suspension your tracked Camaro does not

DRAG KITS

Drag 1 Kit:

The Zeta II CAMARO Platform is an excellent beginning suspension package that can be greatly improved with the magic that Pedders has to offer. Wheel hop is an issue for the new Camaro and this kit eliminates 2 of the major causes of unwanted and un-needed movement. It also improves the strength of your OE front radius rod bushings, allows you to add 1 to 1.25 degrees of positive caster in the front, plus with the alignment kit, you will be able to get your rear tires to a more desirable camber for better tire grip.

PDUSACAMFULL	Camaro Full Alignment Kit	1

Drag 2 Kit:

This package is for the CAMARO owner who uses his CAMARO primarily for Drag Racing but still uses it for a daily driver. This kit offers all the critical rear bushings, and includes our most HD upgraded bushes for absolute rock bottom control, yet still have the street comfort for daily driving. It also improves the strength of your OE front radius rod bushings, allows you to add 1 to 1.25 degrees of positive caster in the front, plus with the alignment kit, you will be able to get your rear tires to a more desirable camber for better tire grip. You may want to add a set of front coils p/n 220032 that are better matched with the rear 220035 coils for a better street aggressive thru the twisties handling.
